

METAL HALIDE SCREEN EXPOSURE SYSTEM

Amergraph AdVantage[®] 770

Specifically for high production, oversized frames, standard auto frames and registration systems.

FEATURES

- Maximum screen OD: 42" x 54"
- Light source: 7500/2000 watt metal halide instant start, low-power consumption. Hi-low power control/dual photo sensors
- Integrator/controller: 20 channels of memory
- Lithium battery back-up: prevents program memory loss
- Auto-Optimize[®] exposure system: one step exposure system
- Intimate blanket contact: no air strings required
- "Works in a drawer": power supply and reflector easily slide out for cleaning and maintenance
- Double hinged cylinder assisted frames: to aid in glass maintenance
- Small footprint: Only 56" x 60" of floor space is required
- All Amergraph equipment is manufactured under one roof in the vertically integrated Sparta, New Jersey facility.

WARRANTY

Three-year limited warranty.

Leasing available, please inquire.
